

OUR STATE OF THE ART BIGTOP SYSTEM

HERE TO COVER YOUR EVENT

The Mudford Bigtop is a system of configurable structures in which all components are interchangeable.

From a simple 26 by 30 metre one pole to a mighty 41 by 45 metre 4 pole, all components can be used on each structure which has a fabric wall height of 4 metres. All Bigtops are to a blackout specification, which allows the event organiser the ability to control the environment inside the structure. Our Bigtops have been designed by Rudi Enos of Rudi Enos Design, who design and engineer the largest portable structures in the world.

Structural safety is paramount when it comes to Bigtop structures as they are usually at the centre of an event and are the largest structures on site.

Our structures are engineered to meet and often exceed British Standard EN 13782 (2006) which is the current UK and EU standard for temporary structures. The structure is fully fire retardant and has suitable fire exits.

Each Kingpole is designed to suspend an additional 1,000 kilograms UDL for carrying lights, trussing, sound or effects. The 4 metre high side walls allow for placement of performance stages or exhibition stands.

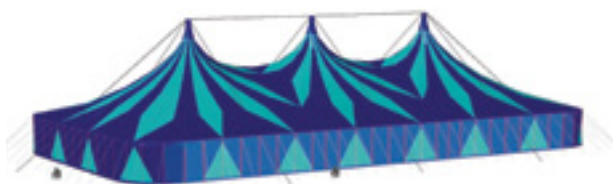

Single structure

The 1 pole has an area of 756m² and a capacity of 1,500.
Height: 14500mm (apex), 4000mm (eaves)
Width: 26000mm, Length: 30000mm

Double structure

The 2 pole has an area of 1,114m² and a capacity of 2,300. Height: 14500mm (apex), 4000mm (eaves)
Width: 26000mm, Length: 45000mm

Triple structure

The 3 pole has an area of 1,656m² and a capacity of 3,300.
Height: 14500mm (apex), 4000mm (eaves)
Width: 30000mm, Length: 56000mm

Quad structure

The largest Mudford Bigtop, the 4 pole, has an area of 1,821m² and a capacity of 3,640.
Height: 14500mm (apex), 4000mm (eaves)
Width: 41000mm, Length: 45000mm
